* Annual Percentage Yield (APY) effective 04/17/22. CDs offered by Edward Jones are bank-issued and FDIC-insured up to \$250,000 (principal and interest accrued but not yet paid) per depositor, per insured depository institution, for each account ownership category. Please visit www.fdic.gov or contact your financial advisor for additional information. Subject to availability and price change. CD values are subject to interest rate risk such that when interest rates rise, the prices of CDs can decrease. If CDs are sold prior to maturity, the investor can lose principal value. FDIC insurance does not cover losses in market value. Early withdrawal may not be permitted. Yields quoted are net of all commissions. CDs require the distribution of interest and do not allow interest to compound. CDs offered through Edward Jones are issued by banks and thrifts nationwide. All CDs sold by Edward Jones are registered with the Depository Trust Corp. (DTC).

Ask the Motor Medics®

Automotive Advice from The Under the Hood® Show

Dear Motor Medics,
I've been having issues with my 2008 GMC Acadia. The Service Engine Soon light comes on and the Trac-Off and ABS lights come on and when they do the message center displays reduced power and I can't drive because I have no throttle response. When I take this thing in to my shop it works for them because it only happens about once a week.

Mike in Daytona Florida

Dear Mike,
That's a ton of stuff going on there, but I suspect they might all be connected. Over the past year we have seen no less than 20 vehicles exhibit this set of symptoms and they all turned out to be the same, a failed throttle body. The throttle body is electric and is the part that regulates how much air enters the engine. There is no cable connecting the throttle pedal to the engine as in the past. This system, as you can imagine must be calibrated exactly and have sensors to make sure that the vehicle does not have unintended acceleration or throttle loss. When the engine computer senses a failure in any of the internal circuits the system goes into reduced engine power mode. It will need to be diagnosed to know for sure and if replaced make sure you keep a receipt for the work in case GM decides to recall it for safety reasons which could possibly make you eligible for a monetary reimbursement on repairs.

Take care, the Motor Medics

305 Cliff Ave. Valley Springs, SD • 605.757.6355

CHEVROLET, BUICK, GMC, CADILLAC, CHRYSLER, DODGE, RAM & JEEP

(507) 755-6615 • ManleyTire.com

582-7500
104 Highway 11 • Brandon, SD

Dear Motor Medics,
I have a 2008 Chevy Impala and when it's cold outside I get a message on the dash that reads "Engine Hot A/C off and the Check Engine light comes on at the same time. Once the car warms up, I can shut the light off and clear the message if I cycle the ignition key. It has been doing this for over a year and my wife is getting nervous about it, so I want to get it fixed.

Tom in Ventura California

Dear Tom,
We have seen this message a few times and although engine codes and messages should be something simple to diagnose, they don't always get diagnosed as easily as you could hope for. The system needs to be diagnosed to know for sure what's up but some of the things to check that can trip the codes are the lack of ability to read engine temperature due to a failed sensor or connection to it or an actual failure of the engine to reach proper operating temperature in a preset amount of time as determined by the engine computer software. Now the message reads Engine Hot, but that's where it gets tricky because when the engine can't reach proper temperature it's often a failed thermostat and that makes the engine run cold, not hot. A strange situation for sure but it's just one of the fun things we mechanics get to deal with everyday on our shops.

Take care, the Motor Medics
