Ask the Motor Medics®

Automotive Advice from The Under the Hood® Show

Dear Motor Medics,

I have a 2022 Mercedes with a backup camera problem. The camera is not very clear when compared to my BMW or any of my other family cars. The last 2022 model car also had a poor-quality camera. Is there something that can be done about the image quality? My dealership says that is just the way it is. I just can't believe that a car of this quality would consistently have a poor camera for several years.

Raymond in Clearwater Florida.

Dear Raymond,

You would think that a high-end car would have some high-end things. The radio, the heat and air, and generally all the electronics on the car but it's not always the case. We have seen some very poor headlights and cameras on even the highest dollar vehicles. As for your specific situation, we would contact a local car audio/entertainment shop and see what they have to offer. If the problem is in the camera itself and not within the dash unit then it may be able to be fixed. Some car models can have the camera replaced with an aftermarket unit that will look the same and interface directly and work as it should with a clear picture. If they say that it can't be done, then you can check with another shop and if there is no option then you may have to live with the poor-quality image and hope the next model has a better unit.

Take care, the Motor Medics.

Dear Motor Medics,

I just bought a 2014 GMC Sierra 1500 truck for my son to drive to college which is a 4 hour drive each way. We had the used car inspection done like you promote and during that inspection we did find significant repairs needed and the seller was willing to help us with those repairs instead of lowering the price and we were ok with that. After one trip in the dark though, we found that the headlights on the low beam were horrible. Not just weak but dangerous to see. Is there anything that can be done to improve them? Online reviews also list them as terrible.

Perry in Lake Andes South Dakota .

Dear Perry,

We have had the same experience in our own trucks with this model of headlight. The beam is what is called a projector beam like an old projector we had back in school days and is supposed to give a non-blinding light beam that illuminates the road better. With this model of light, it didn't work so well. For us and many others, since it is a projector housing, we upgraded to an LED lamp and our light output greatly increased without being blinded to other traffic. Never put that kind of bulb in a regular light housing as that makes it one of those offensive headlights that you meet on the road which blind you. Ask your local shop what they recommend for the situation too.

Take care, the Motor Medics.

FOR ENTERTAINMENT ONLY

ALWAYS CONSULT YOUR LOCAL SHOP AND FOLLOW ALL SAFETY PROCEDURES BEFORE REPAIRS.
